A Good Sleep, A Healthy Life

The body, which is mentally and physically tired in daily rush, needs a good sleep to renew itself. The effect of a good sleep on feeling energetic and fit during the day is an undeniable fact.

Just as eating habits affect the immune system, the body cannot renew itself and begins to weaken when it does not have a good night's sleep. For this reason, a good sleep leads up to a healthy life.

**Why is body
temperature
important for a
comfortable
sleep?**

AYDIN

A suitable sleep environment is one of the most necessary and essential conditions for a comfortable sleep process. In addition to the mattress and sleep products, body temperature is also one of the factors that directly affect sleep.

Sleeping in an extremely hot or extremely cold environment can cause harmful effects by disrupting the metabolism during sleep. Therefore, the temperature of the surface contacted during sleep is one of the most important issues for an ideal sleep environment.

37,5

Developed for you to get the most efficient sleep, 37,5 is designed to offer you everything you need for ideal sleep thanks to its advanced technology.

Thanks to the active particles in it, it helps your skin to maintain the ideal temperature of your body by absorbing water vapor and infrared energy in your body.

Control your body temperature

A healthy sleep can affect body with a lot of different beneficial way. “37,5” mattress fabric which is developed by Aydın R&D department guarantees more than a healthy sleep to his clients. With its hypoallergenic structure, skin-friendly “37,5” absorbs water vapor and your body’s infrared lights.

Thanks to this, while your body protects its core temperature, it stores emitted infrared lights in itself. Then it uses these stored infrared lights to heat your body when it is needed. Moreover, quick-drying 5 times more than other fabrics, “37,5” provides necessary ground for ideal sleep.

AYDIN

“37,5” technology that regulates your body temperature

While you are sleeping, thanks to its active particles, 37,5 mattress fabric absorbs water vapor and infrared lights by providing 2 driving forces which cannot be paired with no other technology.

By doing this, your skin helps to maintain your ideal core temperature.
